

Proposed Actions of LIFE 15 CCM/DE/000138

A. Preparatory Actions

- A.1 Adjusting collaboration for action implementation and coordination
- A.2 Calibration of GEST methodology for monitoring the success of management actions in the project countries
- A.3 Study and improving data on project sites, with developing GHG emission scenarios
- A.4 Adjusting mires management & restoration concepts (with elaboration of management plans if required)
- A.5 Elaboration of technical concepts and designs for restoration measures and collecting necessary contents

B. Purchase/lease of land/compensation payments for use rights

C. Implementation actions

- C.1 Elaboration and Demonstration of best practise scenarios for raised bog and fen management for minimizing CO₂-emissions
- C.2 Restoration measures for conserving carbon resources accumulated in peatlands and maintaining or restoring the carbon accumulation by peat forming process
- C.3 Testing of innovative methods of peat forming vegetation, restoration after peat mining - on bare peat surfaces and in water bodies
- C.4 Elaboration of recommendations for experts and stakeholders on mire management "with practical demonstration"

D. Monitoring of the impact of the project actions

- D.1 Monitoring of the impact of the project actions by key indicators
- D.2 Monitoring the success of restoration measures
- D.3 Assessment of socio-economic impact of project

E. Communication and dissemination of results

- E.1 Elaboration and maintenance of project homepage
- E.2 Shooting a documentary
- E.3 Establishment and transfer of transportable exhibition
- E.4 Organisation of national events and raising public awareness about mire role in the CO₂ emission mitigation and climate change
- E.5 Publishing of information materials
- E.6 Nature trails/improving the accessibility to sites and information panels in the field
- E.7 Travel to participate in scientific conferences
- E.8 Layman's report

F. Project management

- F.1 Project management by NABU and coordination in the project countries
- F.2 Independent audit certificated for the concerned beneficiaries, requesting at least 325.000 €
- F.3 Elaboration of After-LIFE conservation plan
